Trade Out of Poverty Petition

We, the undersigned, recognising that the world's poorest countries face barriers to poverty-reducing trade, many of which are imposed by wealthier countries, call upon the leaders of rich world countries to commit to:

Open up their markets unconditionally to all the poorest countries
Simplify trade rules to let developing countries share in world trade
End rich country export and domestic subsidies which hit poor countries' trade
Help **Reduce** tariffs between poor countries
Support **Improvements** in roads, ports and administrative structures that make trade possible.

Please circulate the petition and obtain signatories.
